## Affordable vintage Christmas ornaments

Kevin Milaeger

**Too often**, when we hear an adjective such as "vintage" we immediately think of a higher price tag. Of course there many high priced vintage Christmas ornaments, but there are many very good ornaments that we sell for much less. Here are a few photos.

These \$2.99 ornaments are anywhere from 1.5-3" wide, and come in a variety of shapes and colors, including some of the "Shiny Brite" types. Most are American made; others are from Germany and Poland, and other European countries.

Nearly all of these were produced from the period right after WW2 up into the 1960's. Many have started to acquire the patina that we associate with older ornaments.

\$2.99

\$3.99

Just one step higher at \$3.99 we find many ornaments of the so called "indent" or "reflector" type, as well as some stenciled and unsilvered ornaments. All evoke memories for many of our customers. These were made in both America and Europe, with the American ornaments usually being a little heavier in weight.

We have many hundreds of vintage ornaments in the price range of \$2.99-3.99. They would be beautiful additions to your collection. In these photos we have the ornaments hanging on our flocked "Snow Twig Pine Tree," which is available in two versions---6' and 8' tall. [Email us](#) if you would like more

information on these trees or any other of our "almost real" trees.

Please feel free to [email](#) me with any questions or comments.
